- **Presenters: Trained Team of a Physician and a Registered Dietitian from your community**
- **Brought to you by *EPIC® - Pediatric Obesity: evaluation, treatment and prevention in community settings***

Engaging 1-2 hour program with helpful handouts

Host this interactive presentation where an expert physician and a registered dietitian team offer latest evidence-based findings on what you can do TODAY with your overweight and obese patients/clients and their families to promote wellness. Presenters will cover the current science and clinical implications regarding food, diet, beverages, sugar, sleep, mental health, screen time, and activity (outdoor activity in particular). We will have plenty of time for Q & A and lively discussion!

“EPIC®– Pediatric Obesity” is funded, in part, under a contract with the Pennsylvania Department of Health through the Preventive Health and Health Services Block Grant from Centers for Disease Control and Prevention (CDC). Other partners include the PA Academy of Family Physicians and the PA Academy of Nutrition and Dietetics.
